thought I would be a good DVD or ISO burner..but it keeps crashing or just freezing even when running it on my custom build system with a Intel Core i5 processor and 8 GB of ram it just seems to run but i get occasional freezing or system crashes.. \*Everytime I try to make a disc it freezes and i have to reboot\* Have tried with the TASCDC but it doesnt work correctly and doesnt give me the option to copy to both ISO AND MDM so far I gave it a 3 star for being no better then DVD Burning Software I have already used and I'll probably never use it again... No idea why, but it must be a bug because this software worked fine on my Windows 8.1 laptop and Windows 10 laptop and they do not have different versions. The only thing that changed was the version of Windows. also need to address the

fact that you don't support windows 7. But for windows 7, this application would be useless... ## Visual-ISO Crack+

Visual-ISO is a simple app that can be used to create an ISO file and burn it to disc with minimum effort. With a GUI that reminds us of a simple burning app, Visual-ISO initially requires users to choose the files to be included in the ISO project. Users can select absolutely any file format, with two different media options at their disposal: CD for a 700MB disc and DVD for up to 4800 MB of data. Drag and drop support is also available, but this didn't work on Windows 7 during our testing. Once you're done with the file selection task, you have nothing else to do than to hit the "Make ISO" button and proceed with the actual ISO image file creation job. The app can burn the ISO too, while also providing a special

---

option to erase a rewritable disk, be it a CD or a DVD. No advanced technical knowledge is needed and a help manual is missing from the package, but don't worry, most features are very intuitive and can be safely used by both beginners and those more experienced. Visual-ISO supports all common image file formats, including JPG, TIF, BMP, GIF, PNG, PCX, TGA, WMF, GIF, JPEG, PICT, EMF, ICO, PSD, etc. Additional file formats can be included by those who want to go beyond the app's limitation. Burning is performed using the BIN file format, which is not exactly the same as WinRAR's CAB format, but it can be used to burn ZIP, RAR, 7z and ACE archives to both CD and DVD. Visual-ISO is a quite light app that uses the minimum available resources, resulting in a fast ISO creation

---

job. You will see that performance is good, but to be sure you may want to use XCopy (more here). Visual-ISO has a lot of nice features when it comes to ISO creation, allowing the user to create three different types of ISOs: Single Layer DVD ISO: Using two ISOs, you can create a DVD-5 DVD with one DVD and one CD that gets burned onto the CD (visible in red). Multi Layer DVD ISO: Using two ISOs, you can create a DVD-5 DVD with two DVD and one CD that gets burned onto the DVD (visible in red). CD/DVD ISO: Using two ISOs,
